# Improve Joint Flexibility and Mobility

COLABO Joint Care combines powerful ingredients to support joint flexibility, reduce inflammation, and fortify joint strength together with blood cholesterol reduction.

## The Ingredients

### Undenatured Collagen Type II (40mg)

Collagen extracted from chicken cartilage. It helps to promote the production of new cartilage and reduce the breakdown of existing cartilage. It reduces osteoarthritis joint pain, stiffness, and inflammation.

### Black Sesame Extract

For bone and joint care, It promotes cardiovascular health.

### Prebiotics

Promotes the growth of Bifidobacterium, and gut health.

### Rice Germ Extract

It promotes heart health, reduces cholesterol.

### Vitamin D3

It improves calcium absorption. It helps the development of bones and immune boosting.

### Mixed Berries powder

It boosts immune system and skin health. Rich in antioxidants.

Powered by Undenatured Collagen Type II, an ingredient that has been clinically tested to reduce joint discomfort and promote healthy cartilage, joint flexibility and mobility for healthier living.

# Transforming Lives Through Smooth Movement Patented Ingredients. Real Results.

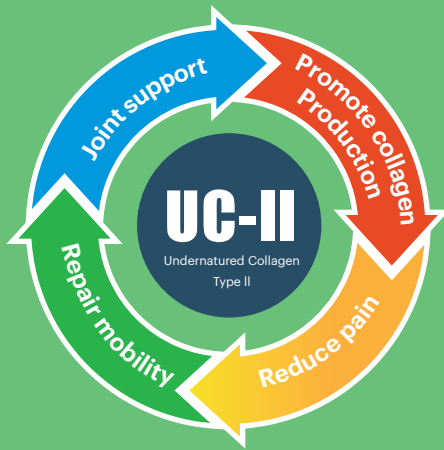

COLABO Joint Care contains Undenatured Collagen Type II, an ingredient derived especially from chicken sternum cartilage using state-of-the-art methods.

Undenatured Collagen Type II can provide support for aging joints and it is effective in reducing damages and pain caused by normal wear and tear due to daily activities or strenuous exercise. It functions by promoting collagen formation in the joints and slowing down cartilage degradation. It reduces joint pain, stiffness, and inflammation in people with osteoarthritis.

## What is Undenatured Collagen Type II?

Undenatured type II collagen derived from chicken sternum cartilage using a patent pending new method.

- ✓ No trace of contaminant or solvent residues
- ✓ No content of glucosamine and chondroitin
- ✓ Low temperature production technique means
- ✓ Type II collagen is not denatured during the process

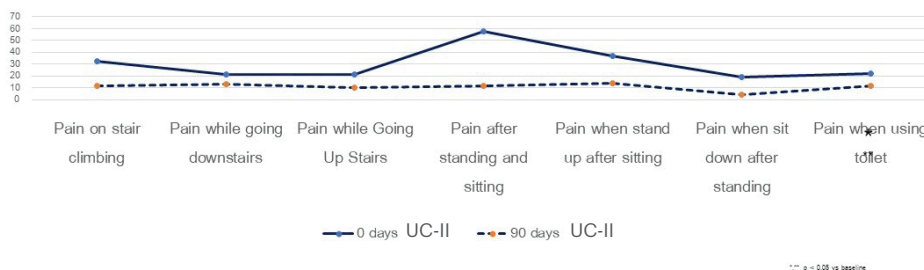

## Why is Undenatured Collagen Type II Better than Glucosamine & Chondroitin?

UC-II clinically proven to be more effective than glucosamine & chondroitin

Benefits	UC-II	Glucosamine & Chondroitin (1x)
Fast effects within 30 days	Yes	No
Reduction in joint pain and stiffness	Significant reduction (2.2 times faster)	Moderate reduction
VAS Score reduction	2.7 times faster	Moderate
LFI Score reduction	3.3 times faster	Moderate
WOMAC Score reduction	2 times faster	Moderate
Protects joint cartilage	Yes	Moderate

Clinically Better Acting than Glucosamine for Reducing Joint Discomfort.

## Clinical Cases Daily Activities

**UC-II shown significant result of daily activities versus Baseline**

- 40 Male and females
- 30 to 60 years old

### Improved daily activities for OA

A study was conducted with 40 males and females aged 30 to 60 years old, all experiencing knee OA symptoms. Participants took 40 mg of Undenatured Collagen Type II per day for a study period of 90 days.

The study found that Undenatured Collagen Type II showed significant improvements in daily activities compared to the baseline.

For reference of healthcare professionals only.

**Type II collagen is recognized as highly beneficial. It constitutes the primary component of cartilage, which acts as a cushioning tissue, facilitating smooth movement and providing support to the joints.**

## Revitalize Your Joints Naturally!

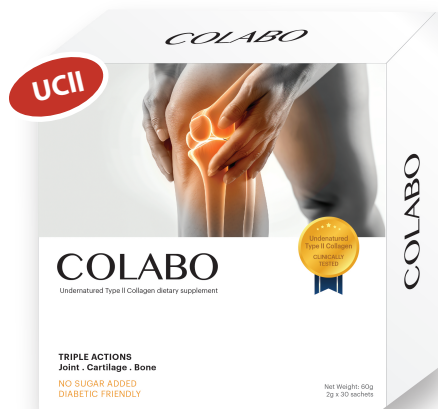

### Who need this:

- ✓ Feeling of catching or locking in a joint
- ✓ Pain doesn't go away with rest
- ✓ Pain gets progressively worse
- ✓ Unable to put pressure on your leg after an injury
